Swastik's

Sattva Vikas School

(Pre-Primary to Higher Secondary)

The Inspiration

Swastik group of schools was established by Shri Chandraprasad R. Pathak in 1959. Shri Pathak Sir, a student leader during his college-life was an innovative physics teacher. He has strongly believed in inculcating, in children, the right ethos and values of our rich Indian culture and tradition. Blessed with these qualities, Sattvites outshine everyone wherever they go. The spirit of fearlessness and dynamism has always been very close to Chandraprasad Sir's heart. Like a brave heart he has taken his prodigies to far away destinations, instilling in them the quality of adventure and confidence.

He was awarded the President's award for the best teacher in 1989 by the then President of India, Shri R. Venkataraman. Today, under his guidance after five fulfilling decades Swastik is a name synonymous with quality and mastery oriented education. In all, 3000 children are being nurtured in the five branches of Swastik group of schools at Nava-Vadaj, Sardar Patel colony, Sindoor society, Thaltej and Jodhpur Char Rasta.

As thoughts are the seeds of all actions, let me plant only good, pure seeds so that the fruit will be the BEST.

Welcome

The aim of this prospectus is to give you a taste of what life is like at Sattva Vikas School.

The melodious cooing of the cuckoo, the enchanting dancing of the glorious peacock, the joyous youthful prancing of a waterfall, the murmur of the sea, the fiery roaring of the king of the jungle and our little mynah's loud chatter; is their inherent quality and natural and spontaneous to their persona. Similarly, it is natural for a child to be full of innocent mischiefs and pranks and to be an infinite bundle of energy and enthusiasm. To cherish beautiful dreams in his twinkling curious eyes is his right. So, while nurturing children - 'a beautiful creation of the Almighty', we should take utmost care that their childhood is not put on a leash and does not suffocate in rigid regimentation.

Sattva Vikas means 'A Shrine of Happy Childhood'. In the child-centric environment of Sattva, children are nurtured and groomed with life-enriching values and ethos and also strengthened with abilities to march ahead in leaps and bounds aided by the latest technology.

Sattva seeks to help all the students develop their talents for their own sake and also to help them make the world a better place.

Academic excellence is highly valued and children are encouraged to become confident independent young people who are able to meet the demands of life in the 21st century. We believe that the development of the whole person is essential to education, so a varied programme of extra-curricular activities and a strong emphasis on personal development serve to ensure that children reach their Mastery-Level.

There is a unique atmosphere about the school. The happiness and generosity evident in the classroom and playground; the open, frank discourse; and sense of endeavours, have given pupils a love for the school.

Let us together explore Sattva Vikas.

Putting the best foot forward

Life at Sattva

'What you can expect from us'

The relationship between the parents, students and staff of the school is one of close partnership in parenthood.

We set out here what we expect to deliver to students and parents as our part of this partnership.

Our fundamental aim is to nurture the child to become 'the whole person' : spiritually, morally, intellectually, emotionally, socially, physically and artistically.

To provide the highest quality of learning environment based on thorough preparation and use the best possible resources.

To create lifetime-learners and leaders of tomorrow who can face the challenges of the next century.

To provide children with spontaneous and creative opportunities and a broad and balanced curriculum which is intellectually challenging and leads to ultimate academic success.

To provide a safe environment that is psychologically and emotionally nurturing and which is conducive to learning : equally about academics as well as oneself.

To provide equality of opportunity in all aspects of school life and encourage children to act as ambassadors for the school.

To produce creative, socially aware, free thinking and motivating global citizens who move towards their chosen goals with great energy, self-confidence and commitment.

To stimulate a desire for learning and to educate our students to realize that knowledge is the competitive key to strengthen self, community, country and world at large.

Be Inspired
Be Rewarded
Be Yourself

Life at Sattva

'What we expect from our students'

We have outlined the qualities of a true Sattvite which describes what we expect from our Sattvites on a daily basis.

These are the guidelines for the smooth running of the establishment.

- students will work to the best of their ability at all times
- students will come to school each day properly dressed and with the relevant self-learning material for the day's lessons
- all the students will arrive at lessons on time and no student will leave school or a lesson without the permission of a teacher
- respect will be shown to students, staff (including lunch time supervisors) and visitors – foul language is unacceptable at any time
- students will not cause damage of any sort to the school equipment, building or grounds
- movement around the school will be quiet and orderly
- students should not tolerate any form of bullying
- mobile phones and personal valuables will not be brought to school
- all teaching areas will be food and drink free zones – litter will be placed in the bins provided.

We are sure and confident that students will not hesitate to make us aware of any difficulties they may encounter.

Children today, Leaders tomorrow

Our Curricula : Scientific - Integrated-Time - Tested

We believe - There are multiple intelligence with autonomous intellectual capacities.

Every individual possesses varying degrees of each of the following intelligence:

Linguistic Intelligence

Logical Intelligence

Mathematical Intelligence

Musical Intelligence

Spatial Intelligence

Bodily kinesthetic Intelligence

But the ways in which intelligence combine and blend are as varied as the faces and personalities of students.

Our uniquely designed dynamic curricular process is progressive and well researched. It addresses the different aptitudes and capabilities of each learner, giving every student a total educational experience in an affirmative learning environment.

Sattva Vikas School - 'A SMART e-School' with techno-loaded environment provides auto-learning

stimulations to all the pupils. Though surrounded by electronic and digital wizardry, Sattva Vikas School exudes an ideal blend of rich culture and tradition. Equal emphasis on yoga, art, music, sports and varied activities lead to a Holistic development.

Cultural activities include debates, public speaking, elocution, quiz, drama and theater, music and intra-cultural training along with participation in various competitions.

Each child grows with pride in oneself and Indian values, empowered with life-skills to impart an influence on a changing society with creativity and confidence.

Tech Savvy

Our school has 250 computers aiding the process of teaching-learning and also act as a performance booster. Technology is smartly

interwoven in the school curriculum, to help achieve mastery and unprecedented excellence.

Sattva Intranet - An Electronic Wizardry

Wiredswastik is a techno-nerve of India's first smart school. Sattva's Intranet Server not only connects the computers to all the classes, staff-rooms and library but also connects the minds of the senior learners (teachers) and the junior learners (students).

In the school's techno-structure, there are computers, on each and every bench, in all the classes. All the computers are connected through LAN.

Under this software, all the teachers and the students of all the classes are allotted their own user-names and passwords.

The teachers generate multi-optional questions from all the chapters. The questions prepared here are categorized into three levels (i) Easy

Catch the sunshine. Smiles go everywhere

(ii) Medium (iii) Hard and saved in a question bank. Our question bank has 25,676 questions.

All the students can see the questions when they log on, by using their user-names and passwords.

So, within a few seconds, the students can attempt approximately 40 questions. After the test is done, the students can see their performance and they can also find the correct answers for the questions, where they went wrong. Thus, the students learn the same concept again and again which ultimately helps them reach the level of mastery.

The Intra-net server with a programmable program, helps our facilitators to generate E-Test for each concept taught. The multiple choice questions of E-Tests enhance the ability and capability of children to easily meet the desired goals of competitive exams and they come out with flying colours. Such E-tests familiarize the children with similar evaluation techniques at an early stage.

Mastering the first language : English

Realizing the importance of impressive and flawless language in the present scenario, Sattva Vikas School carries out varied interactive activities to give confidence to each and every child in his language ability.

A new and sturdy concept has been evolved in the teaching-learning process of Sattva. In this new approach, the emphasis has been shifted from teaching to learning and from passive knowledge to effective understanding in real life situations. In order to engage the child beneficially in this process of learning, Sattva has bridged the gap between comprehension and expression through thought provoking design and structure.

Vocabulary enhancement through word webs, web charts, word maps, word forks are a few examples of making learning interesting, enjoyable and stimulating.

Every attempt is made to lead students to learn by the ways that will certainly amuse them - a play way method in which students themselves take an active part and play this part with increasing interest.

Language is received and transmitted primarily through the sensory channels (ears, eyes, hands). Thus, keeping in mind, that becoming competent in a foreign language requires listening skills,

comprehension skills as well as reading skills, the language educators here at Sattva provide the best learning environment in which all our senses are involved.

Amalgamation of different methodologies to enhance the linguistic skills

- **Weaving a web of story:** Story writing is an ideal way of boosting the creativity and improving the word treasure of children. Adding a twist, story writing is done in a novel way. Our young writers are given either the beginning or the ending of the story and they have to come up with a complete story. Each child presents a master piece using his ingenuity. This adds to the element of innovation to story-writing.
- **Spell-a-thon:** To overcome the barrier of poor phonetics, spell-a-thons are conducted on a regular basis where children exhibit their prowess in spellings.
- **Effective speaking contest:** An effective and fiery orator can impress one and all wherever he goes. Sattva children are trained by professionals, to polish their public speaking, with special emphasis on finer nuances like body language, pronunciation and diction.
- **Recitation:** To ignite the interest of the little ones in poetry, the finest form of literature, students are encouraged to come up with their

own creations and recite it during the assembly. As competitions bring out the best in children, recitation competitions are a part and parcel of the curriculum.

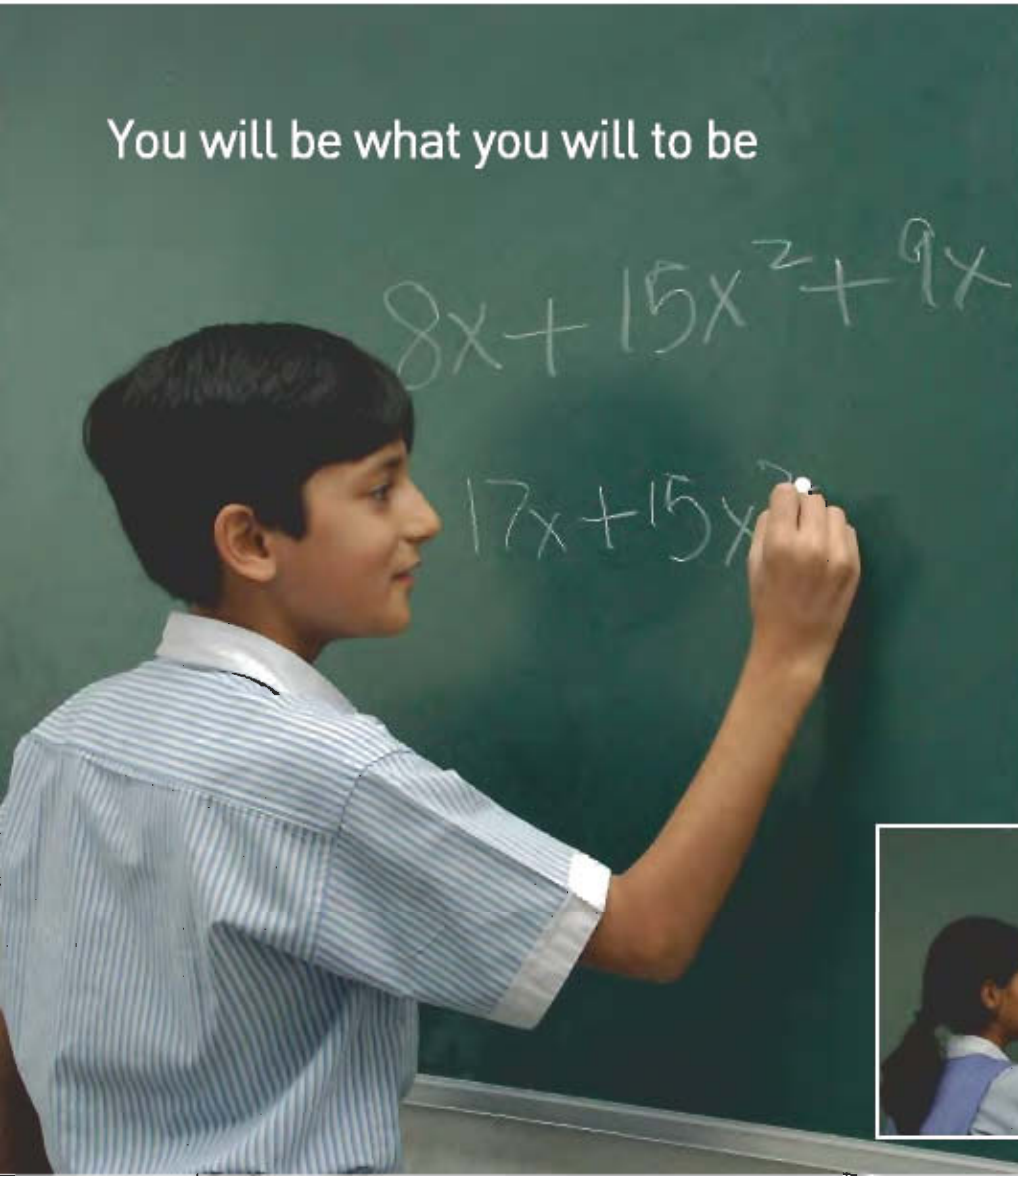

- **Drama:** Where else can the children gain confidence, poise and individual style in expression; but on a stage, performing in front of an audience. Hence Sattva Vikas, in the form of drama, gives children, a platform to add to their personality. Children are given the theme or the topic of the play to be enacted. The rest is accomplished by team-work and co-ordination. Each one shows his forte in to the aspect of production of a play.
- **Teen Ink - Our very own in-house publication, Sattva Times :** Our budding writers are given a wide canvas to voice their feelings, emotions, ideas through the Sattva Times. Full of zest and zeal our youth brigade, under the guidance of our supportive faculty, compile, edit and design their school publication. Being a tech-savvy school, the entire process is carried out in Sattva's production house. This gives a sense of pride and elation to the Sattva fraternity.
- **Festivities as a language booster:** The spirit of festivity is inter-woven into the fine fabric of language building. During festivals like the Corn Fiesta, Janmashtami, Navratri, Independence Day, children are given the opportunity to realize their true potential under minimal guidance. This in turn helps in self-expression and also surfaces their talents of leadership and camaraderie.
- **Assembly - a family time:** Assembly time is the most cherished time, as the entire Sattva family together feels the Sattva vibrations and are one with the Almighty in a soulful environment. During assemblies, year round each and every Sattvite is given an opportunity to share the thought of the day and also keep Sattva updated with the latest news.

Conversation is the laboratory and workshop of the students.

Mathe magicians

You will be what you will to be

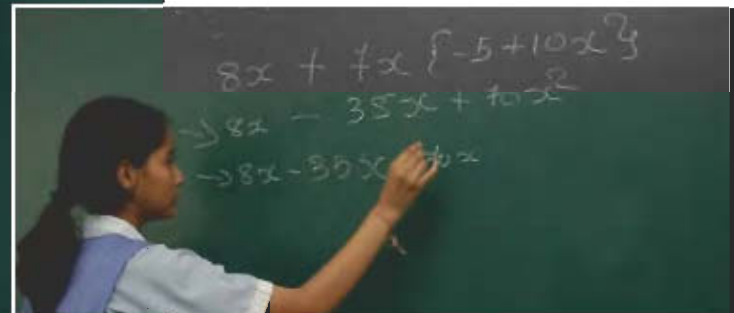

Math being the core subject, the curriculum, is scientifically and logically designed to lead the child into the fascinating world of mathematics.

Concepts are explained in easy steps to facilitate understanding of fundamentals of Mathematics at each level. Moving from simple Mathematical operations like fractions and decimals to the more complex sections like matrices, trigonometry and solid algebra are learnt through interesting methods aiming at logical and lateral thinking. Examples from real-life situations and a range of interesting and challenging exercises ensure that each student imbibes the crucial Mathematical skills of critical thinking and problem-solving. Attractive illustrations are used to enhance the visual appeal at the primary level giving better clarity to concepts. The teaching of Math is designed in such a way so as to inculcate in pupils a sense of curiosity and an urge to explore.

Quiz including puzzles and Mathematical brain teasers reinforce learning. Innovative activity based tasks provide students the opportunity to apply the concepts learnt in various aspects of their day-to-day life, while sustaining their interest in Math and moving towards perfection.

Learning Math happens in a manner enabling students to appreciate the usefulness and applicability of Math in real life situations and to explore its relationship with other subjects in the curriculum.

A boost to inter and intra disciplinary thought process - Science

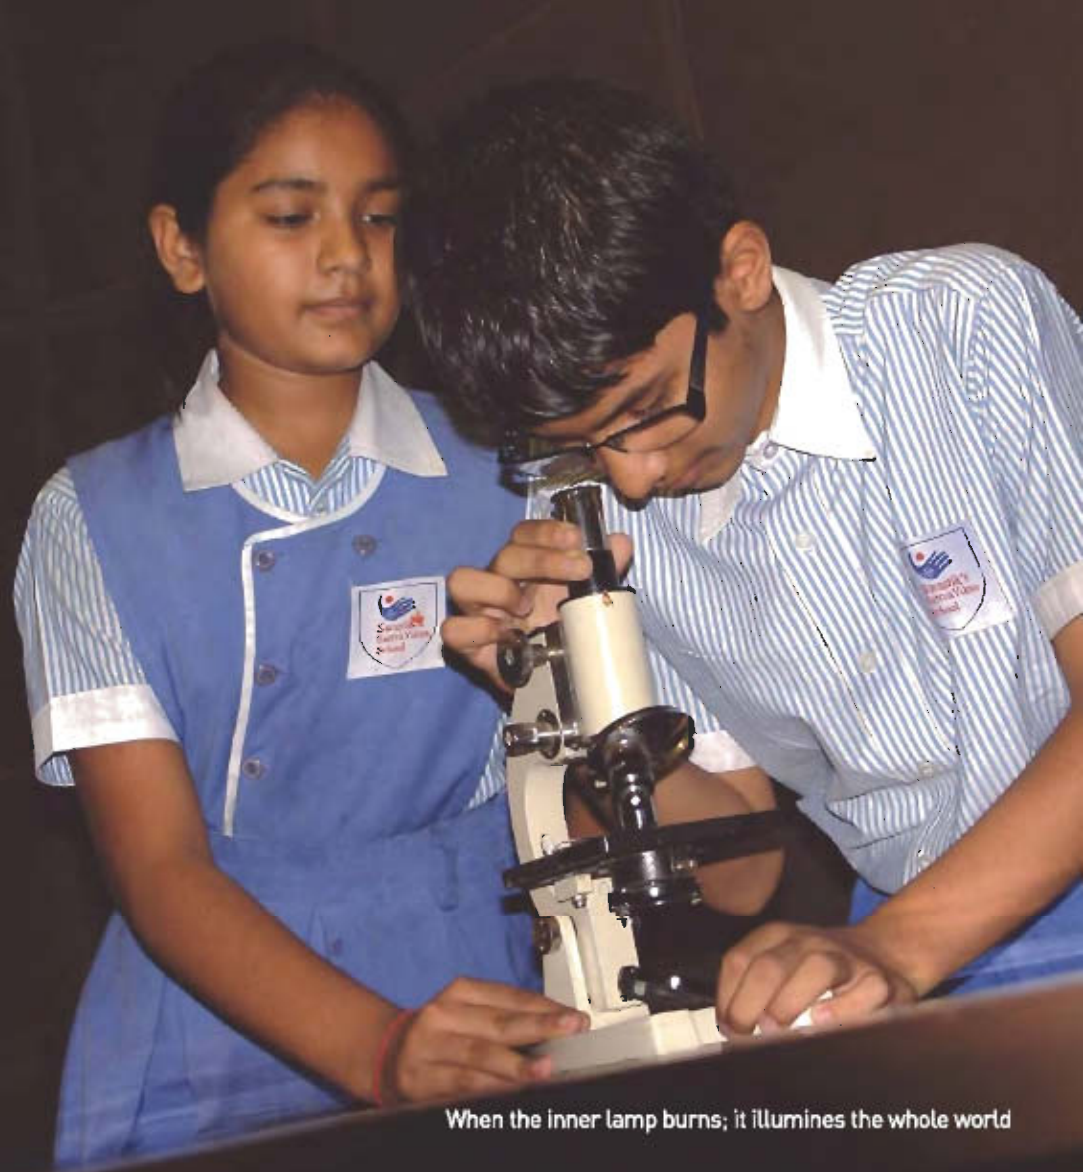

Science is a vast and fascinating subject that integrates all the spheres of life. Teaching and learning of science in Sattva is done in an inter-active manner and is related to the child's surroundings: to develop skills of observation, collection of information, investigation and drawing conclusions.

In a typical science class, children are engaged in joyfully exploring the world around and harmonizing with it. Asking questions is always encouraged and learners are urged to connect new ideas to existing ones. They are spurred to think logically and gain confidence in their own abilities to solve problems. Provided with necessary hints, children are guided to think in the right direction. So, the young mind of a Sattvite is developed to foster the natural curiosity and to help develop their scientific temper.

In Sattva, the science classes have been designed to introduce the young learners to the world of science in relation to their immediate environment. Out door activities like field trips help the children to comprehend the topics taught.

Thematic approach and self-explanatory illustrations along with fact files elucidate the concepts and stimulate the young minds.

In the class room, science is taught in a way; that encourages class room discussions, instills in children the ability to reason and nurtures and develops the skills of investigation and experimentation. The innovative teaching methods of science in Sattva, serves the purpose to make children aware that science is not a mere study of principles, but it is equally important to apply these principles to improve the quality of our lives.

When the inner lamp burns; it illumines the whole world

Social Science

Creating progressive global citizens

Our school has adopted the "National Syllabus 2000 for Formal Education" as per the educational policy of Government of Gujarat in which the content of all subjects has been framed keeping in mind the various stages of the mind of the child.

Social science, the science of evolution of society is an integral part of the general education at all the levels of school education. The study of this subject helps the young students to understand the changes that occur with the changing times in the society in which they live in and are a part of. It expands the intellectual horizons of the learners. The progress of the human society is a continuous and flexible process. Today's change is linked to the past and is related to various other parts of the world.

The curriculum of social science provides every student, the future citizen, systematic and scientific knowledge about the social organisation, political structure and economic setup of India and the world. The subject is taught in a number of innovative ways. It starts with a brief introduction of the topic and detailed

discussion of the content. To enhance and improve retention, students are shown slides or CDs on different related topics in the Dramatics Laboratory. Also field excursions are arranged every year for the students which enables them to relate the theoretical and practical aspects of the subject. We ensure that an overall development of the personality takes place along with making them intellectually advanced.

India has a rich and varied heritage. This heritage and feeling of unity with our nation is taught to the students. We expose the students to the 'Historical Mistakes' and also try to give solutions for a better future. We try to build in them a bright and dynamic Indianness.

The future belongs to those who believe in the beauty of their dreams.

Proficiency in the Second Languages

Our Sanskrit literature has been an inspiration for many nations and civilizations.

Vedas, the oldest forms of literature especially the Rig Veda, the most ancient one, is a powerhouse of knowledge. Language has played a vital role as a medium of teaching till the art of writing came into existence. Just like the ancient times, we too tune our Sattva disciples in the fine art of languages and literature.

Teaching of Sanskrit, Hindi and Gujarati augments and enhances our curriculum.

Ancient Indian culture is introduced to the young minds of Sattvites at an early age through a comprehensive study of Sanskrit.

Languages like Hindi and Gujarati are introduced from the first grade itself. The children learn the nuances of language and grammar and are also enriched with the writings of great literary wizards.

Techno based Oneness with computers

'Catch them young'

Sattva students live in the high-tech, Information Technology (IT) driven world of the future. They are fast learners and are comfortable with technology. We believe in the adage 'Start early, start right'.

Computer education in Sattva starts from pre-primary classes itself. Our kinder-garten students are acquainted with the basic operations of mouse and keyboard using the applications like Ms-Paint and WordPad. They also view interactive CDs to strengthen various concepts like phonetics, identification of colours, shapes, numbers and alphabets.

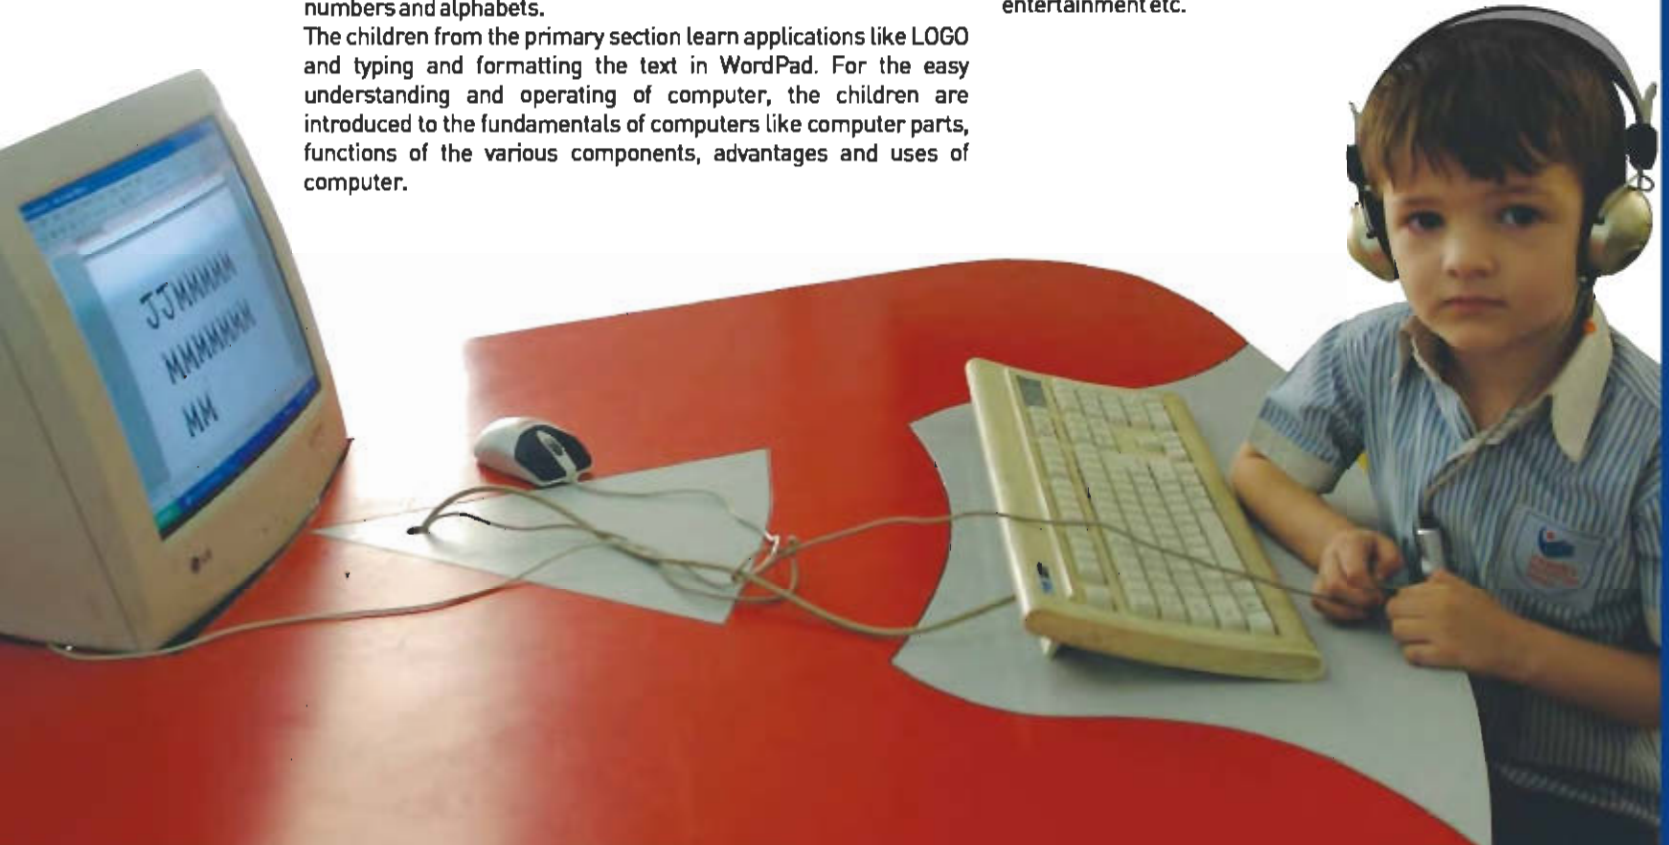

The children from the primary section learn applications like LOGO and typing and formatting the text in WordPad. For the easy understanding and operating of computer, the children are introduced to the fundamentals of computers like computer parts, functions of the various components, advantages and uses of computer.

The upper primary children are taught animation in PowerPoint. Once they are well-versed with the technology, they prepare presentations and slide shows on various topics.

10-12 year olds learn complex commands in advanced LOGO.

The children also learn the techniques of web designing through HTML language, and design informative web pages. Sattvites are taught to design documents, colourful banners, advertisements etc. using Ms-Word.

The age group from 13-15 learns languages like advanced HTML and Programming in C. They develop programs for the solution of real-life problems using C language. Sattvites also learn creation of animation movies through Flash and PowerPoint. To compete with the techno kids of today, Sattvites also learn surfing the internet for various informative subjects and facilities like E-mail, Newsgroup, Bulletin Board Service, entertainment etc.

Artistic Horizons

Visual Art is seen as an integral part of each child's education at Sattva Vikas School, both as a subject in its own right and for enhancing other areas of study. Learning through Art enables children to hone their observational skills, master a variety of techniques and gain an informed appreciation of the work of other artists.

Our Art Studio, with its splashes of colour and refined interiors, provides an enchanting and picturesque environment inflating the creativity of our young Picassos.

Our art program teaches even the youngest students to draw realistically, using basic shapes as the foundation for representing people, animals, buildings, landscapes, and other objects. Each year, the students enhance their skills as they learn more about art elements and principles such as colour, shading, proportion, and perspective. They enjoy applying their skills to illustrate and reinforce ideas from science, literature and geography as well as to design projects of their choice. Craft projects give them the chance to relax and experiment with different media, and gain the satisfaction of creating objects with their own hands.

Various competitions are held to bring out the children's artistic talents and satisfy their creative thirst. To motivate our budding artists, to excel and bring out their best, certificates are awarded. Children are even trained for state level competitive exams.

These activities provide a platform to the students to showcase their talents using their vivid imagination and creativity. It also boosts up their self-confidence and enables them to perform better in academics too.

We aim to send children further with their eyes opened, their hands skilled and their imaginations fired.

**I hear and I forget.
I see and I remember
I do and I understand**

Music - The universal language

Music is an instrument for Sattvites to channelize their energy into constructive output.

Music is an instrument for Sattvites to channelize their energy into constructive output. Under the guidance of our experts, Sattvites explore and appreciate the nuances of soulful music. Within the school premises, they learn to play the instrument of their choice namely - tabla, guitar and keyboard, which develops their rhythmic sense and produce harmonies by blending various

musical notes. Music helps them to improve their reflexes and eye-hand co-ordination. This indeed helps them to soothe their souls by pursuing a hobby and enliven the atmosphere with cheerfulness.

Yoga - Developing Mind, Body and Soul

The word 'Yoga' is derived from the Sanskrit root YUJ meaning to bind the yoke. It is the true union of our will with the will of God.

In a serene environment, under the guidance of professionally qualified yoga expert, Sattva children perform yogasanas to secure purity of body, mind and soul which stimulates, regulates and harmonizes the vital energy of the body, resulting in excellence in all the spheres of life.

Morality is rooted in the purity of our hearts.

A healthy mind in a Healthy Body

Physical Activities provide a change of pace from academics—encouraging healthy recreation. Organized games develop children's concentration, teach them the skills and rules of the games and improve co-operation and co-ordination between team members. Students have an ample scope to learn, from multitudes of activities, as it provides a change from academics and drives away the monotony.

Sports education plays an integral role as a part of students' curriculum at Sattva Vikas and provides a professional touch that accentuates the value of extra-curricular activities. The participation of each student in sports and games is effectively encouraged. Children are coached by professionals who are experts in that field.

Sattva Vikas is a long hours school and students spend almost 7.5 hours in its precinct. The school time-table is designed in such a way that everyday 1 hour is devoted to each activity. The school follows nature's time-table and the day begins with out-door activities like lawn-tennis, volley-ball, basket-ball and karate, invigorating the young ignited minds.

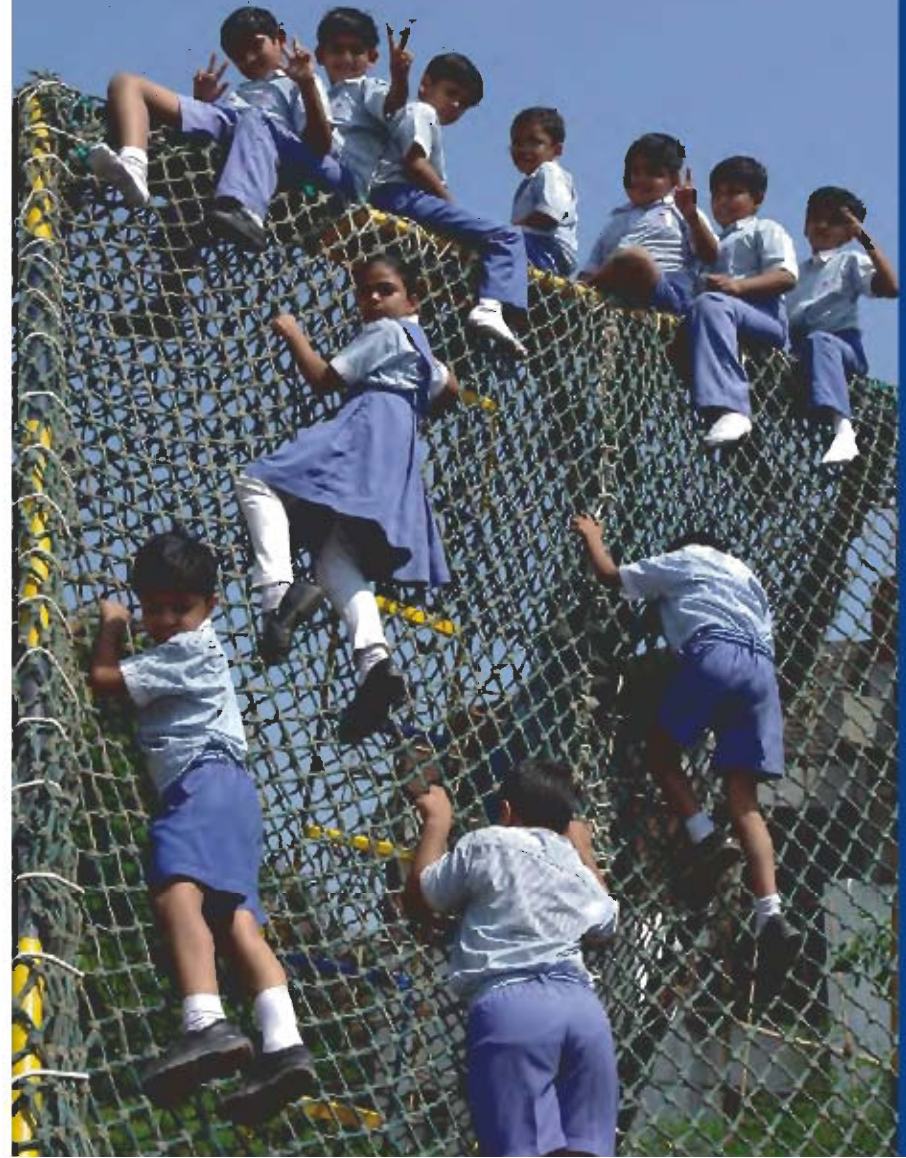

When it comes to physical exercise, winners don't 'go for the burn' - instead they go for the 'glow' that comes from exercising well and within one's capabilities. The secret of Sattva is, 'like all winning, physical activities have to be fun and the fun is in the feeling of one's capabilities extend from day-to-day.'

Children eagerly look forward to these hours of intensive physical activity and utilize their energy in a constructive way before entering the class leading to improved concentration span in studies.

**Strength does not come from physical capacity.
It comes from an indomitable will.**

Faith is put to test when the situation is the most difficult

Body Boosters

I can smile when I'm beaten,
I can shake the victor's hand,
I can pat him on shoulder,
I can say his game was grand !

I can be a good, good loser,
I can take it on the chin,
But although it is not sporting,
I would really rather win !!

Play area

**Moreover sun, give me some sky
I have the wings, I want to fly**

An atmosphere of gaiety and a sense of freedom is experienced in the play area of Sattva Vikas School every morning when the boisterous lot is all set to fly with the wings of excitement and enthusiasm. This happy and playful time is welcomed by each and every Sattvite. The basketball and tennis courts, the playground with swings, slides and merry-go rounds, the vast area to run around freely - what more can a child ask for ?

Prayers - food for the soul

Morality is rooted in the purity of our hearts.

Prayer is an integral part in the holistic development of pupils and a key to inner peace and happiness.

Man's need for prayer is as great as his need for food. As food is necessary for the body, prayer is necessary for the soul. As thoughts are the seeds of all actions, prayer ignites positive attitudes, optimistic outlook and peaceful reverberating thoughts. It is the greatest binding force making for the solidarity and oneness of the human family.

Hence, devotional prayers enrapturing the body, mind and soul form an integral part of the curriculum, initiating euphoric bliss and an aura of peace for our learners.

State-of-the-Art Infrastructure

What is school?

A school is a building which has four open ended walls
And a tomorrow inside.

- Learner centric classrooms
- Technology enabled campus
- Well equipped labs for computer
- Learning resource centre with print and multimedia resources
- Art studio for different artistic expressions
- Contemporary auditorium for dance, drama and music
- Modern sports facilities

- Play area for Tiny-Tots
- Aesthetically designed homely residential units
- Spacious dining area
- Library - our reading zone
- Techno-aided dramatics lab
- Music studios for sweet melodies
- Language development HUB

Reading Zone

Sattva considers books to be the best murals and boasts of a vibrantly designed library - 'an ocean of books', opening multiple vistas of knowledge. The Sattva library is so well designed with its hue of colours that the moment the children step into it, they are transported into a mystical world of books which evolves an interest and love for reading.

The study schedule of the children facilitates a regular visit to the library to inculcate the habit of reading from an early age and empower them with excellent language skills.

Library is a favourite haunt of the children. It is not only a place where children read books but it also gives flight to their imagination. Reading of a book is followed by interactive language building sessions.

'A mirror to one's inner thoughts and emotions' a thoughtful technique lets children converse with their own self leading to self introspection and a halo of understanding their own strengths and weaknesses.

Reading as a tool

Reading aloud is an art and particularly a useful one. It leads to 'good' accent and perfect speaking voice as well as superb delivery.

In "Verbal Judo" i.e. mock situations; children play out imaginary scenes featuring their friends and acquaintances. So, they feel at ease in any situation. Experiments with electronic equipment accentuate vocal characteristics, accents and above all emotions. Using the tape recorder and an unplugged phone for the 'acting-into-the-phone' technique enlivens the atmosphere of our library.

The library with its ideal ambience exposes Sattvites to a wide range of literacy themes and techniques. It helps them to explore the wondrous world of books which strengthens their phonetic foundation and also enriches their vocabulary, leading to success in purposeful and functional writing. It enables the children to achieve mastery in creative writing and logical skills through innovative and comprehensive hard sheets which interweave the reading activity with the academics.

Each time a book is read, a seed is sown in the mind.

Thought pierces even a wall of steel

Sattva's very own Intensive Residential Programme

For the board examinations, Sattva faculty strives hard and takes it personally upon themselves to provide detailed guidance and support to ensure total success.

Sattva Vikas School is the only school which offers a Goal-Oriented 3 month Residential Academic Program with a unique and scientifically prepared, individualized self-learning plan for the ultimate giant leap towards excellence in the Matriculation and XII Examination.

In a spacious and airy residential complex, students have a power-packed stay and get individualized guidance and support from the facilitators. Our students daily undergo thorough revision of three subjects for three hours spell each. Home visits on Sundays are granted after prior permission. Early rising followed by yoga, outdoor games and concentrated studies take them towards their Ultimate Goal.

Pledge of the Resident Sattvite

I, the Sattva Resident, today, take a sincere and honest pledge that
I will make optimum utilization of my golden and crucial
period of learning in Sattva.

My one and only goal is to strive towards excellence
and live up to my parents long cherished Expectations.

Concentration, commitments and perseverance
will be my only friends.

I will avoid any distraction which takes me
away from my goal.

My goal is to Excel in everything I do.

Self-driven, we carve a niche for ourselves

Dramatics Lab

Integrating Theatre in Education

Sattva Vikas School boasts of an aesthetically designed state-of-the-art Dramatics Lab which provides the students, an opportunity to develop not only their oratory skills but also facilitates the development of a multi-faceted personality. The Sattva students enact topics related to their academics especially Social Science and English and also improvise their self-scripted play which in itself is a great moral booster, adding to their sense of achievement

and self esteem. Theatre and Public Speaking strengthens the value of team spirit, effective organization and also time management. In an orthodox Teaching-Learning Scenario, students find it difficult to visualize and comprehend Grammar and Social Science topics especially civics. But in a Smart School like Sattva Vikas, students look forward to learn the finer nuances of these subjects with great enthusiasm. As some of the students enact the whole chapter or a particular topic from Social

Science the rest of the students write down the dialogues. Here Social Science is interwoven with English Grammar. Children change the dialogues into indirect speech, change the voice, transform sentences (simple, compound, complex) as per teacher's instructions. Exercises vary from class to class. In lower classes, students identify, nouns, adjectives, adverbs, etc. Ideal blend of technology and theatre leads to optimum understanding of two subjects namely English and Social Science, simultaneously.

Presentation Domain

Ultra-techno modern Presentation Domain gives teachers the complete freedom from the so called routine chalk and talk method and enables them to bring out optimum techno presentation. The Smart board technology allows us to save each and every transaction, and ultimately the final notes can be easily given to students. Teachers not only use powerpoint presentation and a flash technology but can directly use the softwares for enhancing the concept clarity. Even Mathematics and Science teachers inter-relate their subjects and design inter-active multi disciplinary quizzes. This methodology helps in developing mathematical and scientific reasoning and further enhances their analytical skills.

Our Food - Court - 'Annapurna'

Eat healthy Think Better!! Eat nutritious study smarter!!!

Sattva provides the children with a hygienic and clean dining area - 'Annapurna' where all the students enjoy 'The Happy Lunch Hours' together in a warm and caring environment.

Sattva nurtures the students with delicious and well-balanced food with a mouth-watering varied menu at every Sattva meal time.

The bubbling little ones also enjoy a glass of milk, juice or shake depending on the season, before they leave for home. We have excellent meal time assistants who supervise the children at lunch time.

The team of Annapurna in-charges takes special care to see that children eat with correct table manners and etiquettes.

Annapurna gives a special flavour and touch to the birthday celebration of each and every student by serving their favourite dish on their special day. In a homely and warm environment that exists - children eagerly inform the chef what they would like to have on their birthdays. Annapurna makes the children feel like prince / princess on their birthday.

Our innovative classrooms

Each classroom in Sattva is spacious and exclusively designed with child-friendly furniture. Our classrooms for the tiny-tots have exceptionally designed benches which give an impetus to the vivid imagination of our bubbling and exuberant lot.

Our active angels sit on the car like benches and zoom towards excellence as they learn with fun and laughter in a vibrant surrounding. Pretty photographs of children on their personal lockers and note books give them a feeling of possession and a sense of belonging.

The benches in the primary section too suit the needs of a techno-savvy teaching-learning environment. They are designed in such a way that they serve two purposes. First, to keep the books and study, and second, to work on the computers.

Small class sizes, a safe environment and a family atmosphere give the children the conditions necessary for success. A supportive programme of personal, social and health education addresses the needs of slow as well as fast learners. The well qualified, caring staff delivers the curriculum with authority and understanding.

Staging the stage: Perfecting for tomorrow

Sattva prides itself with an extraordinarily beautiful and spacious auditorium. It has neither doors nor windows symbolizing that all forms of creativity is welcome and freedom of self expressions. Right from the assembly, to year round celebrations and functions, all take place in the auditorium, making it the busiest and the most happening place within the school premises.

Techno-Ignition Hub

Time moves at a tremendous speed and Sattva is keeping pace with it.

The techno-ignition hub is a hi-tech computer facility which places Sattva among those few schools which provide computer aided education to its students in one of the most developed and modern manner.

The Hub is well-equipped with all the latest gadgets and also has a software which evaluates each student's level in subject understanding and also the student's progress from one level to another. This facility given by the school proves to be a gift to every Sattvite.

Ideal Teacher-Student ratio

Lucky Sattvites!! The school has taken utmost care to see that the teacher-student ratio is 1 to 9. This being the case here, every child is given personalized attention and care which is so needed in the process of growing up.

Like a Godfather, Sattva has been very particular in taking care that no child is lost in the crowd. In fact here, the child's hand is held and he is led to enlightenment with great love and care.

Bonding with the roots

Quality time with family

No burden of homework-No school bags-No water bottles-No stationery

Considering the extreme pressure of today's complex education system, Sattva Vikas has been very careful in making sure that its students have a stress free education. All the concepts are learnt in the school itself without children ever having to take home the burden of homework. The concept of 'self-learning' is promoted to the highest degree. Every minute detail is revised with the student not less than twenty times making sure that concepts and ideas are engraved permanently in the minds of Sattvites. Children are encouraged to enhance their life skills and understand the niceties of world's complexities from their grandparents and parents. We believe that every Sattvite should be proud of his family and family traditions. As each student has his personal locker, children come to school without the burden of back breaking heavy school bags.

Every piece of stationery is provided to the students in Sattva and this aids in cultivating a feeling of oneness among the students, which is one of the foremost lessons that is instilled in every Sattvite. It is this feeling of oneness and unity which keeps all the students in Sattva on the same platform and the nastiness of comparison between one student and another is done away with.

Individualized teaching-learning challenges and support

The teaching-learning process takes into consideration the needs of each and every student. The slow learners are withdrawn from the class and coached individually. So they move at their own pace and ultimately reach the desired standard without any complexes. The fast learners on the other hand move forward to the next concepts and solve exercises which suit their level, testing their intelligence, as they master each competency. Each child moves at his own speed towards mastery without any prejudices.

How do students reach the school?

The school has a fleet of buses which pick up and drop the children from the door step itself. Parents are not inconvenienced with reaching their children early in the morning at bus

stops. Even the ride in the bus is looked forward to by the children. Our compassionate crew takes ample care of each child's safety and comfort.

To become a member of the Sattva Family, all that is required is an inclination towards a smarter way of education. Unbelievable but true, there are no interviews of either student or parents during the admission process. Full faith is kept in the student's interest in studies and the willingness of each child to perform his best and prove to be a true Sattvite. In fact, parents are encouraged to ask as many questions as they want to clarify doubts regarding nurturing of their wards. After complete satisfaction and understanding of Sattva's teaching learning process, parents select Gurus for the child.

Admission - A pleasant process

The 11 mantras of

Sattva Vikas

A holistic approach to child development and the secret behind Swastik's success story.

Self-reliance for Quality Enhancement

The syllabus has been designed to promote self-learning. Creative worksheets and projects will help children achieve self-reliance.

Ability to Excel

Students will be exposed to various kinds of learning activities, which in turn will help them overcome real life hurdles.

Technology : A way of life at Sattva Vikas

The school will use the power of modern technology to make teaching-learning processes more effective in order to captivate students, and ultimately move them toward greater learning.

Tuition-less society : Creating a Stress-free World

The Learning Support Department of the school has designed innovative software for deciding remedial processes. Appropriate provision will be made by the school within its premises for students who require the support.

Value based Education

Our great Indian Culture and Sanskaras will not be treated just as a subject but will be imbibed in the day to day learning processes of the school.

Achievement oriented Curriculum

The school aims at providing students over 6000 life situations with the sole purpose of enriching their highly receptive minds. This will enable them to take right decisions at the appropriate time.

Vision for Versatility

The school has a Read-rich program, which takes care of the fact that each book has a reader and each reader has a book from the library to read.

Innovative approach to Inquiry Based Learning

Students will be exposed to e-learning through collaborative multi-media projects. Thus allowing them to master the art of learning 'How to learn'.

Knowledge that leads to Higher Quality of life

The knowledge provided will be formative more than informative. The school will not only develop natural talents but will also shape them as to enable them to lead a higher quality of life.

Accuracy in All Walks of life

Pinpoint precision and accuracy are the virtues, which should be carefully cultivated in students. The school environment acts as a catalyst in making Swastik students Sattvashali human-beings.

Supreme Success

Well-knit, interwoven processes elevate students to their ultimate destination: 'Supreme Success'

Festivity @
Sattva

Marching Meaningfully

Swastik Group of Schools, after five decades of rich experience in the field of education has come up with a learning paradise for children, where technology is a way of life. We have created an environment of auto-education focused on supporting and guiding the child in developing his/her individual faculties and abilities. It is our commitment to make the child's life better, fuller, happier, more secure and more fruitful. It is with these objectives that we have started this Value based education initiative. And there couldn't have been a better name than Sattva Vikas.

Sattva Vikas School is Swastik's answer to complete and mastery oriented education. Symbolically, Swastik has four wings that have the potential of spreading infinitely in all directions.

Our rich experience of interacting with the youth brigade has given us the expertise and inner strength to understand the wants and desires of the learners, and we work towards giving wings to their aspirations.

Even sky is not the limit for Sattvites.
